20 July 2006

NOTICE TO NAVIGATION INTERESTS

AQUIFER STORAGE AND RECOVERY PROJECT

KISSIMMEE RIVER, FLORIDA

1. Mariners are advised to use caution in and around the area 1200 feet up stream of Hwy 78 Bridge between August 2006 and January 2007.
2. A steel sheetpile cofferdam will be temporarily located in this area to construct a permanent intake structure for a water treatment facility. The water treatment facility and intake structure is part of the Kissimmee River Aquifer Storage and Recovery Project being constructed by the U.S. Army Corps of Engineers.
3. Mariners are advised that when this cofferdam is removed that there will be some bollards left to indicate the intake structure that will remain so you can safely navigate around it.
4. Please contact Chuck Wilburn at 813-503-1363 with any additional questions.

FOR THE COMMANDER:

Robert A. Bugg, P.E.
Chief, Construction-Operations
Division
